

Amey Khot

Pune, MH | P: +91 7058562660 | ameykhot2612@gmail.com | linkedin.com/in/ameykhot04 | github.com/amey2612

SKILLS

Languages:	C++, C, C#, SQL, HTML/CSS, Java, JavaScript, .net
Technologies/Frameworks:	SpringBoot, MS.Net, RESTful APIs, Spring Framework, React, Node, Express
Databases:	MySQL, MongoDB, SQL Server
Operating Systems:	Linux, Windows
Clouds & DevOps:	MS Azure (AZ-204), Github, Git, Docker
Networking:	OSI Model, TCP/IP Networks, Switching & Routing, Routing Protocols (OSPF, BGP, EIGRP, MPLS), ITIL Knowledge
Other Tools:	Postman, Maven, Visual Studio, STS, Linux, Windows
Soft Skills:	Leadership, Teamwork, Communication, Humility, Solution Oriented, Ambitious, Adaptability, Work Ethics, Active Listener

EXPERIENCE

PHN Technology, Pune, MH System Support Engineer	Sep 2024 – Feb 2025
• Spearheaded the end-to-end development and deployment of cutting-edge robotic solutions by integrating hardware and software components seamlessly. • Designed, tested, and optimized robotic systems tailored for diverse industrial and research applications. • Successfully implemented advanced robotic platforms, including sensor integration, actuator control, custom robotic arms, and autonomous mobile robots. • Enhanced robotic performance and reliability through iterative testing, calibration, and optimization. • Collaborated with cross-functional teams to ensure efficient hardware-software communication and successful project delivery. • Authored technical documentation detailing robotic architectures, workflows, and system specifications. • Assisted in basic network configuration and troubleshooting for robotic systems, including LAN/WAN connectivity and IP addressing. • Supported network-level communication setup between robotic hardware and control systems using TCP/IP protocols. • Monitored and maintained network stability to ensure uninterrupted data flow between sensors, controllers, and cloud endpoints.	

EDUCATION

Centre for Development of Advanced Computing (C-DAC), Pune, MH PG-DAC Major in Advanced Computing Grade: A <i>Relevant Coursework:</i> C++, Java, MS.Net, DBMS, Web Programming And Tech, Operating Systems, Advanced Data Structures	Feb 2025 – Aug 2025
D.Y.Patil College Of Engineering Technology, Kolhapur, MH Bachelor of Technology Major in Electronics & Telecommunication CGPA: 7.57/10 <i>Relevant Coursework:</i> OOPS, DBMS, Computer Networks, Operating Systems, Data Structures and Algorithms (DSA), Information Security	2019 – 2023
The New College Kolhapur, Kolhapur, MH HSC Percentage: 65.38	2019
Maharashtra High School Kolhapur, Kolhapur, MH SSC Percentage: 85	2017

PROJECTS

Happy-Tails (Pet Clinic Management) <i>Spring Boot, Java, RESTful APIs, MySQL, React, Spring Security, Git</i> • Built a full-stack management system with Spring Boot (backend) and React (frontend).
--

- Implemented REST APIs secured with JWT & Spring Security.
- Integrated AWS S3 for file storage (medical records, reports).
- Used Postman for API testing and conducted unit testing with JUnit & Mockito.
- Applied Git and Maven for version control and build automation.

Athlete-Log (Sports Record Management)

ASP.NET Core, SQL Server

- Developed a backend-focused CRUD application to manage athlete records, including Athlete ID, personal details, sports category, and tournament participation.
- Implemented RESTful APIs in ASP.NET Core for creating, retrieving, updating, and deleting athlete data, ensuring scalability and modularity.
- Utilized SQL Server for structured data storage and optimized query handling.
- Conducted API testing and validation using Postman to ensure reliable and accurate data flow.

Robotic Arm

Embedded System Design

- Engineered and constructed a robotic arm with precision control and versatile movement capabilities.
- Utilized Arduino Uno microcontroller and servo motors to enable accurate motion and automation.
- Demonstrated expertise in mechanical design, electronics integration, and embedded programming for real-world robotics applications.
- Achieved seamless coordination between hardware and software components, ensuring reliability and performance.

CERTIFICATIONS

- CDAC (PG-DAC Java Full Stack)
- Backend Web Dev Bootcamp
- Backend Web Dev with Node.js
